

Project Budget Plan

CSE 316: Microprocessors and Microcontrollers Lab

University of Asia Pacific

Team Information

Student Name	Student ID
Mst. Saida Alam Mukti	23101003
Md. Mohibur Rahman	23101006
Md. Jubaer	23101008
S. M. Asikuzzaman Abir	23101022
Sadia Tasnim Ananna	23101023

Component Budget Summary

The table below outlines the hardware requirements and estimated market costs in Bangladeshi Taka (BDT).

Component Name	Qty	Unit Price	Total (BDT)
Arduino Uno R3	2	750	1500
L298N Motor Driver	1	160	160
Ultrasonic Sensor (HC-SR04)	5	100	500
Bluetooth Module (HC-05)	1	350	350
Servo Motor (SG90)	2	150	300
4WD Chassis Kit (Motors/Wheels)	1	900	900
Li-ion 3.7V Battery	3	100	300
Battery Holder (3-Cell)	1	52	52
Jumper Wire Set	2	100	200
Breadboard (Full Size)	1	120	120
Switch	1	20	20
others(Glow gun, glue etc)			200
Grand Total			4402 BDT

Note: there are some components damaged during implementing our project.
